

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER SERVICE LINES

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

As required by U.S. EPA, Lake Alpine Water Company was unable to verify your water line material and therefore it is classified as a *lead status unknown* service line.

Lake Alpine Water Company recently conducted an inventory of all water service lines, which is the pipe that connects your home to the water main. The purpose of the inventory is to identify the material of these service lines and fittings, including the customer-owned side of the water service line.

We did not receive a customer identification form from you and we were unable to inspect the pipe that connects your home to the water main. Therefore, the line was identified as an unknown material.

Lead service lines or certain galvanized pipe can potentially place you at risk for exposure to lead. Therefore, your service line material will need to be identified. We ask that you complete the line Goggle form at <https://forms.gle/SaCRagDEeWiXyEpL8> or request a hard copy form by email: info@lakealpinewater.com.

Lake Alpine Water Company routinely samples for lead in the distribution system and the most recent water sample results received in September 2024 showed that there was no detectable level of lead in the water. The action level for lead in drinking water is 0.015 milligrams per liter (mg/L) or 15 micrograms per liter (µg/L). The most recent water sample results do not exceed the action level of 0.015 mg/L for lead.

What about my service line?

- Because your service line is categorized as a lead status unknown composition, you can help your public water system identify your service line material.
 - EPA has developed an online step-by-step guide to help people identify lead pipes in their homes called Protect Your Tap: A Quick Check for Lead. (<https://www.epa.gov/ground-water-and-drinking-water/protect-your-tap-quick-check-lead>)
 - Other organizations have also provided tools to identify service line material, such as the LSLR Collaborative (<https://www.lslr-collaborative.org/identifying-service-line-material.html>)
- Please contact us immediately if you feel that we have incorrectly categorized the service line material.

Contact [LAWC](https://www.lawc.com) at [209-753-2409](tel:209-753-2409) or info@lakealpinewater.com to inform us if your service line has been incorrectly categorized to share any information you may find about your service line, or to inform us of your plans to alter or replace your service line.

What happens next?

Please complete the line Goggle form at <https://forms.gle/SaCRagDEeWiXyEpL8> or request a hard copy form by email: info@lakealpinewater.com.

If you are unable to self-identify the line, LAWC anticipates identifying your service line by [August 31, 2025](#).

Lead Related Health Information

- *Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can cause new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.*
- If you have concerns about your water quality, the State Water Board's Environmental Laboratory Accreditation Program has a [map of laboratories](#) that can test your water at the consumer's expense, which can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/labs/
- If you still have health concerns from potential lead exposure in your drinking water, there are point-of-use (POU) devices that can be used on your drinking water taps to provide an additional barrier of protection. A list of these residential treatment devices can be found at: https://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html
- If you have other health issues concerning the consumption of this water, you may wish to consult your health care provider.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
